

AMAZING

MAGIC TRICKS

YOU CAN DO!

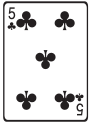

REDS & BLACKS

One of the most amazing card tricks can be done without sleight of hand.

Before starting the trick, separate the red and black cards into two piles and then assemble the two piles together.

Ask someone to select a card and note whether it came from the top or bottom half of the deck. After the spectator looks at their card, return it to the opposite part of the deck from where it was taken.

You can find their card by noting the red card that is in the black half or the black card that is in the red half.

Can you lay out the four 5's so that the total number of spots showing is 16?

SOLUTION

Overlap the cards concealing one spot on each.

THE CRYING REINDEER

(Before you perform the trick, soak a small square of sponge in water and hide it in your hand.) When you pick up the quarter, secretly add the sponge to the backside of the quarter away from the audience. Squeeze the quarter and you will be actually squeezing the water out of the sponge and the reindeer will appear to be crying.
